

WEB-CASTING AND CASE LAW

A continued modernisation and development of the HELP website and of its contents is necessary.

Videos and multimedia materials, in different languages, will be developed and integrated with other training materials, as well as podcast of digital media files. Web-castings of recent ECtHR hearings will be used too, focusing on some interesting cases, as this one.

The European Court of Human Rights on 22/09/2011 held a Chamber hearing in the interesting case of Georgia v. Russia (II). This inter-State application concerns the armed conflict between Georgia and the Russian Federation at the beginning of August 2008.
